

CERTIFIED WELD INSPECTOR

SUMMARY:

Become the next Certified Weld Inspector at SMF, Inc's Anderson, South Carolina facility. You will get the opportunity to inspect welds, improve procedures, and work with our team to supply products to several OEM's across a multiple of industries.

RESPONSIBILITIES:

- Review the welding procedure specification and inspection requirements prior to welding.
- Verify that the specified joint preparation and fit-up used prior to welding.
- Monitoring and inspect all work performed by tackers and welders and/or welding operators.
- Inspect and evaluate welds according to specified inspection procedures, standards, codes, and drawings.
- Record welding inspection results that were witnessed and prepare associated report.

EXPERIENCE & PHYSICAL DEMANDS:

- CSA W178.2 Level 1 or AWS CAWI with at least 1 year of experience in a manufacturing, repair, or operating facility that involves welding.
- Good knowledge of welding processes, layout and fitting, base metals, filler metals, heat treatment, weld testing, and fabrication planning is required.
- Good knowledge of the weldability of ASME P-No. 1 base metals (carbon steels) is required.
- Good knowledge of welding inspection and related NDE methods (MT, PT, UT, and RT), including ASME Sec. V, are required.
- CSA and ASME Code experience is required, where multiple code endorsement certifications would be an advantage.
- Ability to work with hands and stand on your feet for long periods of time often doing repetitive motions
- High School Diploma or equivalent
