

## LASER / PLASMA OPERATOR

### SUMMARY:

Join SMF's team as our next Laser / Plasma Operator at our Anderson, South Carolina location and get the opportunity to burn, etch, and cut parts for our Fortune 500 OEM customers. You'll also interpret blueprints, drawings and other written/verbal instructions and then weigh in on project scope and requirements. This is a great chance for a dependable hard worker to build solid experience and grow with a committed company that truly values its employees.

### RESPONSIBILITIES:

- Sets up and operates Laser and/or Plasma machines.
- Reviews blueprint or sketch specifications.
- Performs inspections of parts; checks height, depth, and thickness using measuring instruments.
- Works with tight tolerances.
- Meets customer specifications and delivery requirements.
- Completes and maintains paperwork.
- Ensures machine is calibrated and clean.
- Checks machine for defects and repair if necessary.
- Performs all required routine and preventative maintenance.

### EXPERIENCE & PHYSICAL DEMANDS:

- 2 years' experience operating fabrication equipment
- Ability to read blueprints or follow technical specifications
- Ability to work with hands, lift heavy objects and stand on your feet for long periods of time often doing repetitive motions
- High School Diploma or equivalent
- Basic mathematical skills
