

QUALITY CONTROL INSPECTOR

Summary:

Among other tasks, the Quality Control Inspector will ensure proper use of supplies and labor so that costs remain within budgetary guidelines as established by staff, as well as make sure that work performed is necessary and contributes to the goals of the Quality Department and SMF.

Responsibilities:

- Perform set-up verifications, station checks, gauge calibrations, and weld certifications and audits and document results
- Operate all CMM equipment effectively and efficiently
- Inspect all rejected parts and prepare required documentation
- Inspect gages that are in use for proper identification, current calibration status, and condition
- Answer quality and print questions as necessary during the course of your duties
- Contact appropriate Production Supervisor, and Quality Manager, in a timely manner when nonconforming parts are found, and a disposition is needed
- Ensure that production and/or shipping is not held up from a lack of support from Quality Department personnel
- Follow all safety rules and regulations
- Perform all other duties deemed necessary by the Quality Assurance Supervisor, Quality Manager, or shift supervisor
- Evaluate manufacturing processes, to ensure proper gages are in use at machine stations. Make recommendations for proper gauging required by the nature of the machine work

Education / Experience

- Two years related experience preferred
- High school diploma or GED preferred

Physical Demands:

- Ability to lift up to 50 lbs. when required. While performing duties, employee is regularly required to stand, walk, twist, grasp, lift, and reach. Vision abilities require good close and distance vision, depth perception, and ability to adjust focus. Must pass Drug Test and background check.
